---

Susan,

Correction to what I previously sent you in regards to FEMAs Category B classification. The classification relates to emergency protective measures, time and money spent for response efforts. Essentially it relates to reimbursement for state and local responders. Apologize. Will coordinate with FEMA reps later today on the classifications and any updates. Also will reflect any FEMA updates/changes on next bullets.

In addition, can u ask TCEQ what type of order they issued the prp for cleanup? Kelly stated TCEQ gave Adair 5 days to respond to whether or not Adair would remediate the site?

Confirming:

TCEQ/EPA RA still to tour site today?

President to attend Memorial for citizens of West on Thurs in Waco (we still don't believe he will visit site? Just fly over?).

The command has issued no official Statement regarding the cause of the explosion and has discussed/provided no addition "facts" regarding the ammonia nitrate as a source...

2 OSCs demobed from the site on 4/22 (2 OSCs remain).

OSC E Delgado will transition with OSC Moore on 4/23 and continue to address data needs from the field.

Any other big picture bullets u can think of for today?

Tx
